PROFESSIONAL SUMMARY

Results-driven Senior WordPress Developer with over 14 years of experience in designing, developing, and scaling high-performance web applications. Expert in PHP, MySQL, and Linux Server management, with a proven track record of optimizing site speed and security for large-scale projects. Adept at bridging the gap between complex backend logic and seamless user experiences. Open to remote opportunities within European and international teams.

PROFESSIONAL EXPERIENCE

Senior WordPress Developer | Freelance

2015 - Present

Architected and deployed custom WordPress solutions for diverse international clients, focusing on scalability and clean code standards. Engineered custom plugins and integrated complex third-party APIs to extend core WordPress functionality.

Optimized large-scale MySQL databases, reducing query execution times by up to 40% for high-traffic eCommerce platforms.

Implemented advanced security protocols, successfully mitigating DDoS and SQL injection threats.

Linux Systems Administrator | Afagh Host

2009 – 2021

Configured and maintained enterprise-level Linux server environments for high-availability web hosting.

Fine-tuned Nginx and Apache web servers to handle concurrent traffic spikes efficiently.

Deployed server-side caching mechanisms (Varnish, Redis) to significantly enhance website loading speeds.

Automated daily backup routines and disaster recovery procedures to ensure 99.9% data integrity.

LANGUAGES

English: Professional Working Proficiency (C1 - Capable of technical discussions and documentation).
